

Invited talk on “ Offshore Oil and Gas Exploration in Indian Sedimentary Basins”

8th May, 2025

The Department of Geology, St. Anthony's College Shillong, hosted an invited talk on "Offshore Oil and Gas Exploration in Indian Sedimentary Basins" on May 8th, 2025, for the major students of the department. The talk was delivered by hydrocarbon industry expert Mr. Adam B. Suting, General Manager (Geosciences), KGB & MBP, Oil India Limited, KG Basin Project, Andhra Pradesh. Mr. Suting provided significant insights into the most recent technologies employed in offshore exploration and emphasised the critical role of India's sedimentary basins as hydrocarbon-bearing reserves in the nation's energy framework. He also highlighted potential future exploration opportunities and ongoing projects in the energy sector.

Mr. Suting elucidated the complexities of a geoscientist's work environment and the challenges encountered, while also highlighting their crucial role in propelling the industry's success and advancements within the energy sector. His captivating presentation initiated a dynamic and interactive session, motivating students to contemplate careers in geosciences within the energy sector. As the session concluded, several participants approached Mr. Suting for further insights, underscoring the impact of his engaging discussion on their career aspirations.
