(A Don Bosco Institution)

SHILLONG 793 001

MEGHALAYA - INDIA

NAAC Re-Accredited with 'A'

College with Potential for Excellence (awarded by UGC)

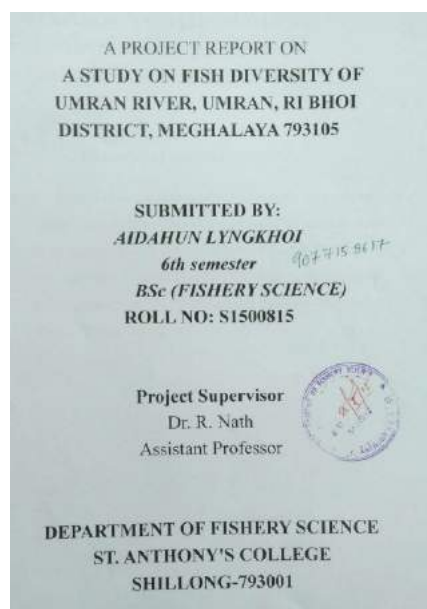

Metric 2.3.1

Additional Information

As an educational institution, the primary focus of St. Anthony's College Shillong is to provide its students an effective and balanced ambience for acquiring knowledge and skills. The institution strives to provide opportunities to every student for their overall growth. For effective dissemination of knowledge and skills, to provide ample scope for learning and to enhance learning experiences of students, the institution incorporates experiential, participative and problem solving methodologies into the teaching – learning process.

In experiential learning students learn from first hand experiences outside a conventional classroom setting; participative learning makes the students undertake the responsibility for their learning by participating in various activities whereas in problem based learning students learn by involving themselves in critically analysing and solving real problems. Following are few of the initiatives taken by the institution towards this end.

- Project works and assignments Students undertake projects and assignments. As a part of that, they have to work on specific problems assigned to them. On completion they have to prepare a report .This exercise helps students to develop their analytical and critical thinking skills enabling them to learn through experience and participation

Sample Project report submitted by a student

- Participation in internships and summer / winter programmes

The students are encouraged to go for internships and summer / winter schools and programmes organised by other institutions or organised in the institution itself. These programmes give students opportunities and exposure to enhance their horizons of learning

DECLARATION

We declare that, we have participated and successfully completed the "Summer Internship Program in Bioinformatics and Molecular Biology techniques" at the DBT-BIF Center and Biotechnology Department, St. Anthony's College, Shillong, Meghalaya, India during May 16 to June 18, 2016. We were trained on Perl programming in bioinformatics, Genome assembly, Marker identification, Primer designing, and various molecular biology techniques including DNA extraction, Electrophoresis, and PCR. Also, we have participated in weekly group discussions and were taught on scientific writing.
